DETAILED ACTION

Declaration under 37 CFR 1.132

1. The Declaration submitted under 37 CFR 1.132 filed on 6/13/2007 is insufficient to overcome the rejection of claims 1-18 based upon Khanarian (5881201) as set forth in the last Office action because: Applicant failed to compare the applied Khanarian reference with that of the instant invention. as shown in the declaration, page-2, the comparison is between a sheet I with particles and a sheet II without particles (Khanarian clearly teaches the presence of particles in its sheet). Similarly, in page-5 of the declaration, the sheet IV is without particles compared to sheet III which contains particles.

Art Unit: 1772

Further, as for allegation that Khanarian does not describe or suggest structurings, applicant is directed to Khanarian, figure-3A which shows structurings, such as point forms at the corners of the surface and also the sloped surface itself is a structuring. Further, the surface roughness taught in the declaration, example-I, in page-2, is not recited in the claims. Said example I also teaches a process step of etching to transfer a surface roughness. It is further noted that the specification, pages 13-14 (bridging portion), teaches that the form of the structuring is not critical. To quote the specification "what is essential is that the light exit surface comprise defects which is capable of extracting light". Therefore, it is understood from the specification that surface defects are known to be part of the mechanical process, irrespective of how minute the defect are. The specification also teaches the depth of the structurings but only as of "usual" dimension.

Rejection Maintained

2. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being obvious over Khanarian (5881201) for reasons of record made in the Office Action of 12/14/2006.

Response to Arguments

3. Applicant's arguments filed 6/13/2007 have been fully considered but they are not persuasive.

In response to applicant's argument that Khanarian does not suggest that the light exit surface have structurings, applicant is directed to Figure-3A of Khanarian, wherein the

wedge-shaped surface, along with the end points, is taken to be structurings. It is noted that the specification fails to specifically define as to the structurings.

As for the allegation of unexpected result, applicant is directed to explanations provided hereinabove (in the declaration section) that the comparison of the instant claimed invention was not made with Khanarian.

Thus, in the absence of any evidence to the contrary, it remains the examiner's position that the claimed invention is deemed to be obvious over the prior art of record discussed hereinabove.

Conclusion

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

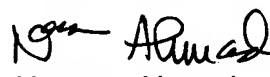

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
